Economic Outlook

Utah Economic Indicators: 2007-2009

- Overview of the Economy**—Utah's economy realized strong growth throughout 2007. The state experienced job growth at 4.0%, more than triple the national rate at 1.1%. The unemployment rate was at a record low of 2.7%. Growth in construction employment continued, with sustained growth in the energy industry and in the professional, business, and financial services. Utah had one of the best economies in the nation in 2007.
- Outlook 2008**—Growth is expected to continue at a slower pace as economic indicators are expected to soften. Employment growth will move from 4.0% in 2007 to 0.4% in 2008, while the unemployment rate should tick upward from a low of 2.7% in 2007 to 3.7% in 2008. Residential construction is expected to weaken further, though overall construction employment should be buoyed somewhat by growth in nonresidential building.
